

Annex

How Digital Medical Certificates (DigiMC) Works:

- DigiMCs will be sent via SMS to patients within 5 minutes of the doctor issuing the MC to them during their clinic visit/hospital stay.

- The unique link* that is sent via SMS requires the patient to unlock the digital MC with their date of birth. In the event that a patient accidentally inputs the wrong phone number during registration and the link gets sent to the wrong person/number, others would not be able to unlock and access the digital MC.
- Once the DigiMC is unlocked, patients can forward the SMS or the URL to their employers or relevant parties. See an example of a digital MC below.
- The SMS link will not expire and patients can access the digital MC as and when needed.
- Patients can also utilise the “Download PDF” button to download and share or print their MCs as needed.
- To ensure patients can successfully receive their DigiMCs on their mobile phones, they are encouraged to verify their phone numbers at the clinics’ self-registration kiosk or via SingHealth Health Buddy mobile application before their clinic visit or hospital discharge.
- For patients who do not own mobile phones or do not have mobile numbers registered with the healthcare institution, paper MCs will be provided.
- Patients who still require a paper MC can request for one within the same day after their consultation or upon their discharge from the ward at no charge. Thereafter, an administrative fee of S\$10.70 (at hospitals and national specialty centres) and S\$5.05 (at polyclinics) will be imposed when patients request for a printed copy of their MCs.

**To safeguard patient's information, DigiMCs are hosted on a government affiliated web domain (mc.gov.sg) with URLs containing a unique string of alphanumeric characters to ensure that each digital MC has a uniquely identifiable key.*

Example of a digital medical certificate:

Official <https://mc.gov.sg> domain lends the MC authenticity

MC is at an unguessable long link
