Defining Tomorrow's Medicine

SingHealth Hospital Clinician Scheme

DISCOVER THE HC SCHEME

The Hospital Clinician (HC) Scheme was developed to provide an alternative standardised career track for junior doctors who wish to work in a public hospital.

Hospital Clinicians will gain necessary clinical experience and broad-based medical competencies through a structured curriculum with work-based assessments, in order to anchor inpatient care services in acute and sub-acute public hospitals.

You will play an important role in ensuring Singapore's healthcare system remains sustainable, while providing a consistently high standard of care.

BROAD-BASED ROTATIONS WITH WIDE EXPOSURE

As a Hospital Clinician in SingHealth, the leading and largest public healthcare cluster in Singapore, you will have the opportunity to be exposed to a myriad of cases through broad-based and specialty-specific rotations for two years. This will get you ready for the different roles and responsibilities as a Hospital Clinician.

ENTRY CRITERIA

Fully registered or Conditionally registered doctors[^] who are:

- ✓ Singaporeans/Singapore PRs or locally trained* foreigners with at least 2 years (full-time equivalent) of work experience as a Medical Officer;
- OR
- ✓ Foreign trained foreigners who are currently under the employment of MOHH and have worked at least 5 years in Singapore.

[^] With Singapore Medical Council

* Doctors who have graduated from a local Medical School or have completed local Internal Medicine (IM) junior residency.

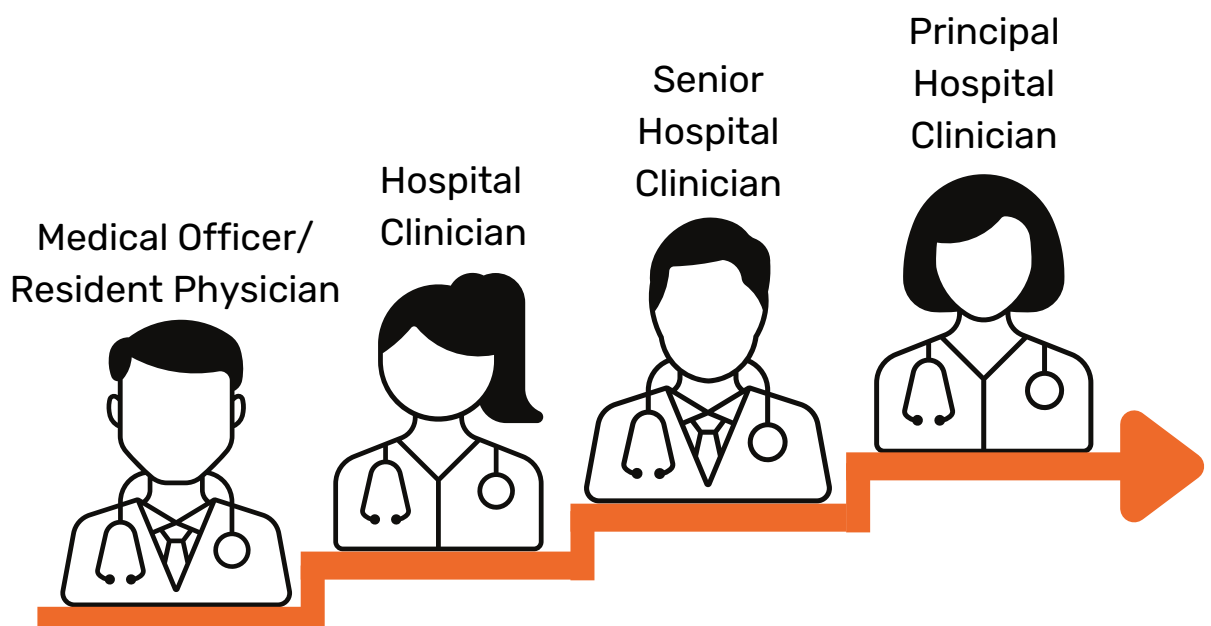

Information is accurate as of Apr 2024.

TRAIN TO BE EQUIPPED WITH DIVERSE BROAD-BASED SKILLS

- ✎ Perform initial assessment and treatment
- ✎ Perform routine reviews, documentation, communication, changes, and simple procedures
- ✎ Identify critically unwell patients, initiate early resuscitation with support from senior doctors
- ✎ Perform common ward-based/bedside procedures under guidance/supervision from senior doctors
- ✎ Anchor team during inpatient ward rounds, including developing daily diagnostic and treatment plans, complementary to the oversight of specialist
- ✎ Oversee immediate and up to 24-hour management of acute inpatients including after office hours, alongside appropriate specialist coverage

YOUR CAREER PROSPECTS

An exciting career awaits you as a Senior Hospital Clinician after the programme. As you gain more experience, you may progress to a Principal Hospital Clinician with opportunities for organisational and administrative leadership roles.
