

PRE-CONFERENCE WORKSHOP

BASIC POINT-OF-CARE ULTRASOUND WORKSHOP

22 Oct 2019 (Tues) | 8:00am – 3:00pm | Academia

ABOUT THE WORKSHOP

This workshop covers the basic principles and practice of ultrasound for clinical scenarios. These skills are neither specifically covered during medical school nor are there frequent opportunities for these skills to be demonstrated and practiced. Thus, there is a need to provide an environment where such techniques and skills can be learned through a structured curriculum.

LEARNING OBJECTIVES

Trainees will gain an understanding of ultrasound physics, knobology and basic skills to perform and interpret the ultrasound images.

Trainees will also learn the application of ultrasound in various body systems, from basic applications such as e-FAST in trauma and gallbladder scans, to basic bedside echo and central venous catheterisation.

Organised By

SPEAKER

Dr Chan Kim Poh

Senior Consultant
Department of Emergency Medicine
Sengkang General Hospital,
Singapore

TARGET AUDIENCE

- Recommended for trainees in Emergency Medicine, Internal Medicine, Anaesthesiology, General Surgery & Surgical Specialties, Orthopaedics and Family Medicine disciplines
- Clinicians and General Practitioners who seek to equip themselves with the basic ultrasound techniques

FEES

SGD321

(Price indicated is inclusive of GST)
