

## PRE-CONFERENCE WORKSHOP

### Difficult Debriefing Situations

23 Oct 2019 (Wed) | 8.30am – 12.00pm | Academia

#### ABOUT THE WORKSHOP

Even for experienced debriefers, there are moments during a simulation debriefing that may be difficult to deal with. When the debriefing conversation becomes a difficult one and affect the learning environment, what can you do and how should you respond to it?

This experiential workshop will help participants identify common difficulties faced in debriefing situations, and explore ways to deal with them. Through coaching by expert debriefers and facilitators, participants will have hands-on experience working in small groups, to refine and practice their debriefing skills.

#### LEARNING OBJECTIVES

At the end of the workshop, participants will be able to:

- Apply the principles of psychological safety and good simulation practice to avoid difficult debriefing situations
- Identify and categorise difficult debriefing situations
- Select and use appropriate measures to turn difficult debriefing situations into learning moments

#### LEVEL

Intermediate to Advanced

#### SPEAKERS

**Dr Gabriel B. Reedy**  
Reader in Clinical Education,  
Department of Faculty of Life  
Sciences and Medicine  
King's College London, UK

**Dr David John Grant**  
President,  
Society in Europe for  
Simulation Applied to  
Medicine (SESAM), UK

**Dr Stefan Gisin**  
Medical Director,  
Department of Anesthesiology,  
Swiss Center for Medical  
Simulation "SimBa",  
University Hospital Basel,  
Switzerland

#### FEES

**SGD160.50** (inclusive of GST)
