2. Hands on:

- TEP/TAPP (Right)
- TEP/TAPP (Left)

3. Didactic Lectures

- Technical considerations and patient selection for IPOM

4. Hands on:

- IPOM repair

Introduction

Surgical residents should be competent in laparoscopic inguinal and incisional hernia repair. Thus, there is a need to provide a safe environment where such techniques and skills can be learned through simulation on a cadaver.

Target Audience

This workshop is strongly recommended for general surgical residents and associate consultants.

Course Objectives

The aim of the workshop is to provide a structured curriculum to enable the learning and practice of laparoscopic inguinal and incisional hernia repair.
