Includes registration to Main Congress

*\*Prices subject to 7% goods and services tax.*

## Topics Covered

### 1. Didactic Lectures

- Indications and Contraindications
- Overview of the technique
- Focus on thoracoscopic dissection of recurrent laryngeal nerves

### 2. Hands on:

- Thoracoscopic mobilisation of the esophagus

### 3. Didactic Lectures

- Focus on laparoscopic abdominal mobilisation of the stomach
- Gastric pull-up options

### 4. Hands on:

- Laparoscopic mobilisation of the stomach and gastric pull-up with neck anastomosis

## Introduction

There is a move towards minimally invasive surgery in all fields of surgery. This includes esophagectomy. Thus there is a need to provide a safe environment where such techniques and skills can be learned through simulation on a cadaver.

## Target Audience

This workshop is recommended for general surgical residents, associate consultants and consultants wanting to gain insight and practice in minimally invasive esophagectomy.

## Course Objectives

The aim of the workshop is to provide a structured curriculum to enable the learning and practice of the thoracoscopic and laparoscopic components of a minimally invasive esophagectomy.
