

SPEED INITIATIVE

Sarcoma Pre-Emptive Evaluation and Diagnosis

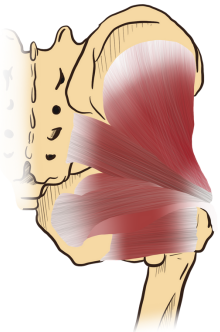

"5 FOES"

Refer patients for follow-up if they have lumps with any of the following features

>5cm in size

ouch
(Painful)

Deep to
Fascia

Enlarging

Stuck to
surrounding
structures

REFERRAL CRITERIA

An accelerated track without prior imaging
From doctors, including GPs, to SPRinT

SPRinT welcomes all referrals of suspicious lumps that fit the characteristics of the "5 FOES". Delay in diagnosis leads to poor prognosis in sarcoma patients. The role of GPs in the early detection of sarcomas is key to improving patient outcomes.

The role of general practitioners in the early detection of sarcomas cannot be understated.
