*A minimum attendance duration of 45 minutes is required for the accreditation of 2 CME points (Pending).

OPENING ADDRESS by:

Adj Asst Prof Ian Loh
Chief, Department of Otorhinolaryngology
Head & Neck Surgery

CLOSING ADDRESS by:

Clinical Asst Prof Christopher Chang
Senior Consultant, Family Physician,
Care & Health Integration, CGH

In these series of talks, we aim to discuss how Primary Care Physicians are a vital part of the holistic management of the OSA (Obstructive Sleep Apnea) patient and expound on the role of the family physician in screening and early detection of suspected OSA. We will explore the relationship between OSA and AR with a focus on how AR can be managed in Primary Care with a discussion on the latest treatment guidelines and when to refer for further investigations and interventions, including skin prick testing, immunotherapy and surgery.

DR JOHN LOH MING REN

Associate Consultant,
Subspecialty: Sleep

MANAGING OSA FOR FAMILY PHYSICIANS

In this segment, Dr Loh will share what Primary Care Physicians can do for patients to manage Obstructive Sleep Apnea (OSA). He will also share on the early detection of the condition.

DR MARIA JUDITH PANG CUI-YING

Associate Consultant,
Subspecialty: Rhinology

ALLERGIC RHINITIS UPDATES

This talk aims to update Primary Care Physicians on the management of allergic rhinitis including adoption of newer therapies. Clinical guidelines will also be shared for physicians to consider before referring to the ENT Department.

MS KHADIJAH BINTE AZMAN

Senior Staff Nurse,
Subspecialty: ENT

SKIN PRICK TESTING FOR ALLERGIC RHINITIS

Skin Prick Test (SPT) is an effective diagnostic test to evaluate condition such as allergic rhinitis. In this segment, SSN Khadijah will share more on how SPT and additional evaluation are done at the ENT clinic for patients with allergic rhinitis.

There will be a short Q&A session at the end of each presentation
